

Coronary Artery Bypass Surgery

Dubost and Couëtil Retractors & Coronary Surgery Instruments Kit

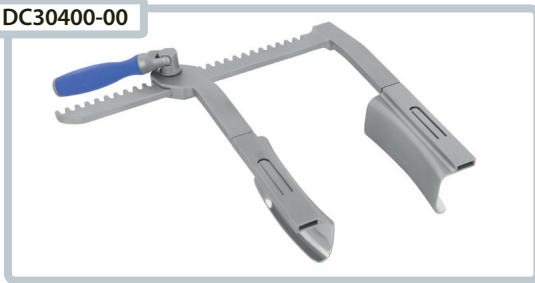

DC30200-00

Couëtil IMA Retractor - «Original»

- ✳ The most user friendly IMA harvesting retractor, light and easy to set-up,
- ✳ Easy motion rack,
- ✳ Multiple hook lengths,
- ✳ Sharp and blunt hook teeth,
- ✳ Free positioning of the system: mobile arm can be assembled on the right or on the left.

DC30400-00

Dubost IMA Retractor - «Original»

- ✳ Retraction for regular sternotomy, opens sternum & exposes the heart,
- ✳ Anatomic interchangeable sternum blades,
- ✳ 3 sizes of blades,
- ✳ 1 blade size for paediatric or Asian patients.

DC33100-00

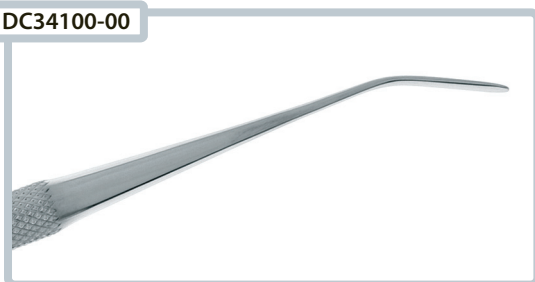

Carpentier Vascular Hook - 90° - L: 240mm

- ✳ Delicate and smooth surface,
- ✳ Precisely laser graduated,
- ✳ Anti slide handle,
- ✳ Other models available in our catalogue: 45° or 125° and 90° with sabot.

Delacroix-Chevalier
Exclusive

DC34100-00

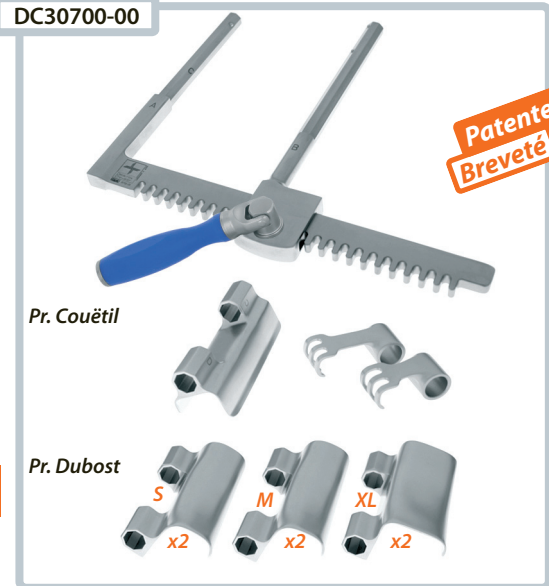

Natali's Spatula - L: 200mm

- 2 sides instrument to retract and dissect.
- ✳ Ultra smooth and atraumatic surface,
- ✳ Ergonomics and stable grip handle,

DC30700-00

Pr. Couëtil

Pr. Dubost

Or

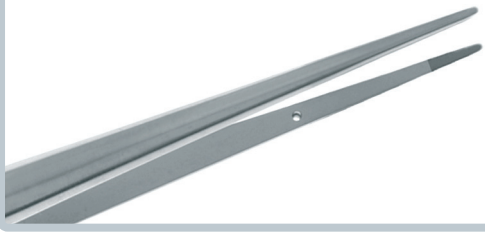

Bypass Retractor

Delacroix-Chevalier
Exclusive

- ✳ Two retractors in one for complete Bypass procedure,
- ✳ The original of Prs. Dubost and Couëtil retractors,
- ✳ Delivered with 3 pairs of blades for Dubost configuration,
- ✳ One sternal blade and two hooks for Couëtil configuration
- ✳ This retractor replaces DC30200-00 and DC30400-00.

DC12310-18

Tying Micro Tissue Forceps - 0.4 x 6mm platform

The finest forceps available. Handlegrip is machined for the most accurate manipulating sensation. They are manufactured under microscope for a perfect grasping precision.

- * Atraumatic,
- * Diamonite jaws,
- * Other models in our catalogue.

Also available in Supergrip

DC12710-21

Counterbalanced Tying Micro Tissue Forceps - 0.4 x 6mm platform

The finest forceps available. Handlegrip is machined for the most accurate manipulating sensation. They are manufactured under microscope for a perfect grasping precision.

- * Atraumatic,
- * Diamonite jaws,
- * Counterbalanced,
- * Other models in our catalogue.

DC13200-24

DeBakey Atrauma Tissue Forceps - 2mm jaws - L: 240mm

DeBakey jaws recommended for the most delicate vascular tissues.

- * Comfortable handle grasp,
- * Available in 3 others lengths : 160mm, 200mm and 300mm,
- * Available jaws width: 1mm, 1.8mm, 2.8mm and 3.5mm.

B40770

Potts-Smith Dissecting Forceps - 1.8mm jaws - L: 210mm

Grasping the needle.

- * Strong grasping,
- * TC jaws,
- * Available in different lengths: 180mm and 250mm.

DC13010-23

Carpentier Resano Dissecting Forceps - L: 230mm

The **Magic Forceps**.

Does everything during the procedure from sensible to strong grasping. Used in all cardiac and vascular procedures.

- * Strong grasping atraumatic jaws design,
- * Comfortable handle grasp,
- * Measured spring pressure,
- * Available in 4 lengths : 180mm, 230mm, 270mm, 320mm.

Exclusive

DC20061-18

DC20063-18

DC20064-18

Jacobson Micro Scissors - L: 180mm

Manufacturing priorities: perfect calibration of the instrument.

- ✦ Perfect balance,
- ✦ Anatomic handle to obtain excellent handling and precise control.
- ✦ Also exist in 25° and 60° versions.

DC20061-18

DC20063-18

DC20064-18

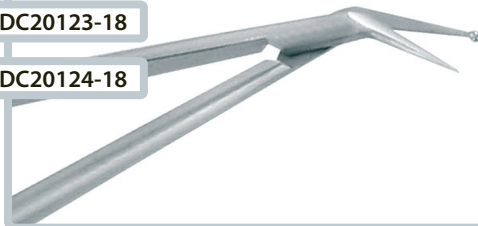

Also available in Supergrip

DC20121-18

DC20123-18

DC20124-18

Ball Tip Jacobson Micro Scissors - L: 180mm

Secure the opening of coronary arteries.

- ✦ 10 mm long blades,
- ✦ 1.5 mm diameter ball tip,
- ✦ Also exist in 25° and 60° versions.

DC20121-18

DC20123-18

DC20124-18

Also available in Supergrip

DC21212-19

DC21214-19

DC21215-19

Hegemann Cardiovascular Scissors - 10mm blades - L: 190mm

Hardness controlled to achieve ideal sharpness and prolonged edge life.

- ✦ Specially treated blades,
- ✦ Assembled, sharpened and controlled to ensure precise and fine cutting.

DC21212-19

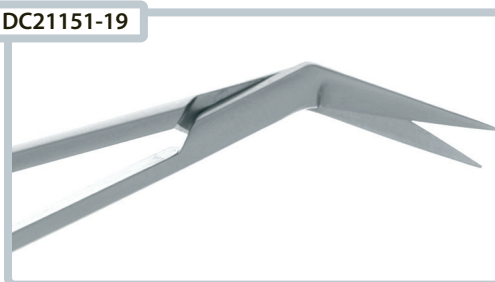

DC21214-19

DC21215-19

DC21151-19

Potts-Smith Cardiovascular Scissors - 20mm blades - L: 190mm

Hardness controlled to achieve ideal sharpness and prolonged edge life.

- ✦ Specially treated blades,
- ✦ Assembled, sharpened and controlled to ensure precise and fine cutting.

B86370

B86375

B86385

Prestige Supercut Scissors - L: 190mm

The great dissection tool.

- ✦ One micro serrated blade, which ensures superior gripping of tissues,
- ✦ One razor blade, for an extreme cutting precision.

DC40080-26

DeBakey Aortic Clamp - L: 260mm

Soft and perfect atraumatic clamping.

- ✳ Deep and regular serration of jaws,
- ✳ Specially tempered to maintain strength and longevity of atraumatic jaws,
- ✳ Ratchet designed for safe, smooth and secure clamping,
- ✳ Joints calibrated to obtain the best alignment of jaws.

DC40263-26

DeBakey Satinsky Anastomosis Vascular Clamp - L: 260mm

Jaws designed to provide tangential occlusion.

- ✳ Specially tempered to maintain strength and longevity of atraumatic jaws,
- ✳ Ratchet designed for safe, smooth and secure clamping,
- ✳ Joints calibrated to obtain the best alignment of jaws.

DC44000-14

Redon Dissector - L: 140mm

For a secured dissection.

- ✳ Round atraumatic tips,
- ✳ Large comfortable rings.

B86505

Prestige Halstead Haemostatic Forceps Without Teeth - L: 120mm

For exposition sutures holding.

- ✳ Straight model,
- ✳ Available with teeth: B86500.

B86515

Prestige Halstead Haemostatic Forceps Without Teeth - L: 120mm

For exposition sutures holding.

- ✳ Curved model,
- ✳ Available with teeth: B86510.

DC41009-57

Original John Hopkins Bulldog Clamp - L: 57mm

- ✳ Individually measured spring pressure,
- ✳ Identical pressure feeling throughout the years,
- ✳ Non reflective surface.

DC50002-21

DC50442-21

Jacobson Micro Needle Holder - L: 210mm

Three different Jacobson micro needle holders recommended for coronary artery bypass procedure.

- ✳ Sharp edges free box lock,
- ✳ DC50002-21S with Diamonite® jaws, DC50442-21S with TC jaws,
- ✳ Jacobson made for sutures ranking 7/0 to 12/0.

Also available in Supergrip

DC50610-23

Very Delicate Micro Needle Holder - L: 230mm

Three different Jacobson micro needle holders recommended for coronary artery bypass procedure.

- ✳ Diamonite® jaws,
- ✳ Jacobson made for sutures ranking 7/0 to 12/0.

DC51100-23

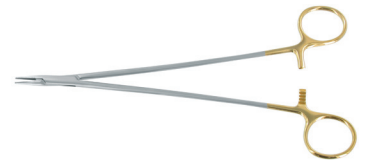

DC51100

Microvascular Needle Holder - L: 230mm

Ring handle needle holder to suture the most resisting tissues.

- ✳ High quality,
- ✳ Sharp edges free box lock,
- ✳ Made for sutures ranking 5/0 to 8/0.

DC51110-20

Micro Ryder

Micro Ryder Needle Holder - L: 200mm

A very precise ring handle Micro Ryder needle holder.

- ✳ High precision jaws features and dimensions,
- ✳ High quality machined TC plates,
- ✳ Sharp edges free box lock,
- ✳ Made for sutures ranking 5/0 to 8/0.

DC51150-20

DeBakey

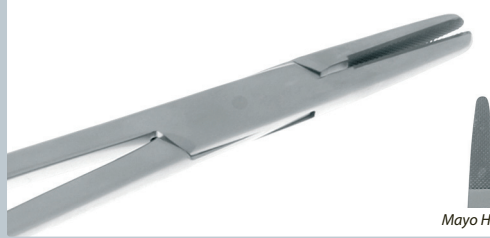

DeBakey Needle Holder - L: 200mm

The regular DeBakey with sharp edges free box lock.

- ✳ Regular jaws features and dimensions,
- ✳ High quality machined TC plates,
- ✳ Made for sutures ranking 4/0 to 6/0.

DC51170-24

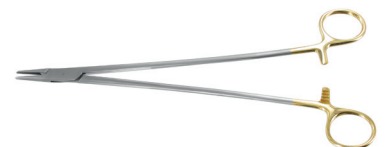

Mayo Hegar

Mayo Hegar Needle Holder - L: 240mm

A regular Mayo Hegar with sharp-edges free line.

- ✳ Regular jaws features and dimensions,
- ✳ High quality machined TC plates,
- ✳ Sharp edges free box lock,
- ✳ Made for sutures ranking 1/0 to 4/0.

DC70400-15

DC70400-25

Heparine Needles Set

Great manufacturing precision and surface finish.

- ✳ Pure austenitic stainless steel,
- ✳ Three different angulations needles in a set,
- ✳ Standard Luer connection,
- ✳ 2 diameters available : DC70400-15: 1.5 mm and DC70400-25: 2.5 mm.

DC71440-15

DC71440-20

Memory Shape Coronary Tester

Special coating for perfect sliding.

- ✳ Ultra malleable to perfectly fit coronary arteries curves,
- ✳ DC71440-15: 1.5mm diameter,
- ✳ DC71440-20: 2mm diameter,
- ✳ Also exists in 0.5mm, 1mm and 2.5 mm,
- ✳ Straight again after sterilization.
